It provides that homestead settlers on public linds within railway limits at the restricted to less than 100 acres, who have herestofore made or may hereafter, make an additional entry allowed either by the act of harch 3, 1574, or of July 1, 1879, after having made final proof of settlement and cultivation under the original entry, shall be entitled to have lands covered by she additional entry platented, without any further cost, or proof of settlement or cultivation.

HOUNE

The river and harbor bril being taken up, on notion of Markham, or Crifform, the appropriation for the survey of San I rancisco harbor on Patho bry, Susua bay, and the anjute of the 'an Jonquin and secrements rivers was done in accordance with the recommendation of a supplementary report of the chief of engineers. Negley, of Pennsylvana, raised a point of or let against the clause of the brill which directs he escretary of war to negotiate for the purbase of the works of the Monorgabeta Navigation company, the value of the works to he as certained by a commission of three engineers of the engineer toris. If the company refuses to sell its works, or demands a price deemed by his secretary to be excessive, the secretary is directed to acquire the works by condemnation, r, in the exercise of his discretion, to take possession of the works. Negley remarked that he clause was extraorchiary, unconstitutional and without precedent.

After further debate, on motion of Wiles, of ventucky, that portion of the clause was stricken out which gives the secretary of war discretionary power to selze the works of the Navigation company.

It will run like a fever—to tool off only when the patient is cold in death. What has been done.' Free whisky has been tried. A hundred years ago liquors could be made and drank without any restrictions, yet there was drunkenness to such an extent as to alarm society.

drunkenness to such an extent as to alarm so-ceety.

Fartial at stinence was tried. Pledges were extensively circuitted and signed not to drunk immoderately. Let what was moderation for one was not moderation for another. Moderate drunking formed the habit for immoderate drunking, since alcohol is a corresive in the sys-tem which induces a disease, like the virus of hydrophotian, and at periodic returns the appe-tite gnaws the vitals.

Total abstinence was tried. Many drinkards were reformed. Many were kept out of hymo-habits altogether. But the evil continued in so-ciety. Saloons lost some customers, yet they plued their truffic more industricustly, poisoned and adulterated their liquous more extensively, and made up on one hand what they lost on the other.

I easing liquor and deriving recome from it we make the traffic pay the expense of appearance. It is not true. If the business is treat to consumer; its enough more to leave to the dealer his margin of prof. It is not from the properous saloun keeper, but from the trembling hand of the toper, and the thin rags of the drumkard's wife that the government likes its revinue. Honest men are willing to pay the tubic expenses rather than have them from the tubic expenses rather than have them from the distribution of the weak and undertunate. High becase is no better than low income. In principle it is the same. In principle it does not work forward the rom on it was suppression of drink. It may, and undenstedly does refine the number of salouns. Yet those that do pay the hecose can furnish the drink just the same if one above now does as much tusiness as two did lefore what is the gain to temperance.\(^1\) If may, and undenstedly does, what off a mine saloons entirely, and limit the area of temptition yet the reduction in the volume of him reduction in the volume of him reduction in the volume of him reduction in the volume of a few monor olists who may work to prefer more of fectively, and hence become a liquor ring mere able to shape legislation to suit; themselves i unesse toyloss, and expect to begin of them expect to decomps and then expect to decomps in the way, and then expect to decomps and then specific or probabilition. It thus becomes prohibition, or partitly prohibition, if thus becomes prohibition, losing its character as heense.

Has been fried. Each township or precinct is allowed to decide, each year, whether there shall be saloons within its borders. We shall be observe that this is limited prohibition. (1) a state admits by passing such a law that pro-bi-tion is a co-rect principle, but it surrenders to it slocality the discretion to enforce the probi-litin. The law in Gregor is virtually lead op-tion.

We call attention to the fact that leaving the we call attention to the fact that leaving the insider to a region just the size of a preciect, is arbitrary. Why not say that each is prace under may have local option. If it were left to so small a district it is easily seen that the effect of the law would be lost. One is not require much support one. All the evils of that school would extend over both. In the manner the ends of the convergence of the day of the manner the ends.

mile support one. All the erile of that salom would extend over both. In like manner the erils in one precinct clearly to the neighboring ones. The beys and lived men of a precinct where there is no salom can easily ride into the next precinct, which allows the traffic. The sc a and scales in the nestrile of three or four unwilling precinits. It shis a fair arrangement?

I ocal option, making the precinct the limit, proceeds upon the supposition that the disoflers occasioned by a salom are limited to the precinct in which it is, which is not the fact. To be fair, the option ought to be coextensive with the public evils. If a whole county is one seal to the traffic, except some one precinci, that precinct ought not to be allowed to bring crime and taxes upon the whole county. Why should not the county, rather than the precinct, he there are no manner, rather than the precinct, he there are no manner to the precinct ought in the option should reside?

By Lidoes the evil of the traffic slop with the county. The traffic anywhere in the state precise and corrupts and burdens the state. If the state is opposed, one county ought not to have the power of bringing the evils upon the state. Why not extend local aphenus, hit not be precinct our the county, lift the state, may have local option, with the time extended so as hot to bring the burden orthodors. The legislitive remeiles in there applied, as actions the provide organizations, have not recreated in the end of drankenness. We do not say that no good has been done by them. We notice that their value has increased in proportion as they have approached to prohibition. The saloon is the den of the viper. Prohibit and the curse of drunkenness will be mainly staged, since the saloon, rooted in the covetonences of unprincipled men, is the main cause of drinking habits. But there are objections raised to prohibition. It does not mest with universal favor. To demonstrate that it is not only theoretically right but practicable lating analyze these objections. If we can show that there is no valid objection to prohibition, we have shown its practicability.

MORAL AND RULE-TOLS SLASION To correct the evils of intemperance, even as we do for other ill habits, such as over-eating or personal uncleanliness. This objection is some times raised by very good men, even Washington teludden of Ohio, among the number. It contains two errors, one supposing that prohibition is intended to force men into moral and

contains two errors, one supposing that prohibition is intended to force men into moral and upright habit, and the other taking for granted that there is some autagonism between moral sussion and legal sussion.

We all admit that moral and spiritual motives must be applied to emoble the personal life life to the conclusion that because we depend upon these, there is not any room for legal prichibition of the rate of intoxicants, does not follow in the least. Do we not depend up in the instructions of the lomos and school and church it see that cur children do not give wightness and minderers. How many of us depend upon law alone to form the right habits in our children do not give with the establishment of the security of society we need law to restrain the residuant of reckless characters who will not be restrained by other moral and spiritual culture, set for the peace of a costy the residuan who will not be restrained by the moral and spiritual culture, set for the peace of a costy the residuan who will not be restrained by the moral and spiritual culture, set for the peace of a costy the residuan who will not be restrained by the moral and spiritual culture, set for the peace of a costy the residuan who will not be restrained by the moral and spiritual culture, set for the peace of a costy the management of restraining the crimin of sales in the question of restraining the crimin of sales in the restraining the crimin of sales in the restraining the crimin of sales in wall a consider and then that if a part was should not expect to ply with all curty, or, in rall and relagious screen to perfect the particle laying.

We come now to the mightest dipe.

This has been iterated and referred. The depends for its value, not up a the extellent of the state, but upon its execution in the courts and juis. An insufficient law well enforce is better this ago of law (papils enforced. This is the objection of slaptics, those who distinct the nobler forces in society, and believe that the nobler forces in society, and believe that mothing can be done unless it is alfed by sor hid mother. These who are inclined to take a deep arrang view of accept, or who have grown werry in well-doing, and are incapable of rouging themselves to a great moral issue, in the this objection. There is not so much in it. The people can be entirely in the most the people can be entirely allowed the properties of the properties of the proof of the properties of the majority from it. The majority which makes a law can enforce it. This has been proved in the probability of states. seen proced in the probability in states. In Mune and Vermont the votors have become three to one in facer of probabilities, in lier a number of years of this law. In kansas a former apponent of probabilities is now governor, and enforces the law and chaims it is neacess.

In I own a legislature has been expended ever a whole her recombination of the probabilities of the probabilities.

NOT READY FOR EROBURITION. It will come in time. The world has been admeng. In due process of the earths revolu-tions we shall wheel around to leg d suppression of the saloot. This, when niged as a reason why we should not labor to effect prohibition, is the argument of the sloven and extamporter. the argument of the sloven and extemporter It is the excuse of the boy who will not work to-day because he thinks that he will be older and abler to-morrow, when, as a matter of fact, if he does not exert himself to day he will not be better able to-morrow (estainly the world has been improving We have been suppressing evil after evil. But how has this alvance come? By sorienting toil, he exhaustre labor by strife. I thiller a reformation came by the efforts of a thousand burning wills. The American revolution was effected by drawn swords. The overthrow of African slavery in America was accomplished at the point of the bayonet. If the advance of the world depended upon these easy prophets, all of whose lines are fat and weak with indolence, this old isphere would rot in its tracks. The world will advance and whisty be prohibited if we exert ourselves to bring this about. If not, it will not. Let the calf cry I will not eat, be-

The Fil i scoundrel class does not always es cape the pentienters. There are 253 persons, according to trison reports from fifteen states, se ving sentences for 'breach of trust, 'em leazher in it,' ilefalention, 'forgery' called by any off or maine, and the rose of rascality is stile tragrant of fraud. Politicians contrib orgely to this had of criminals so do the ranks of Sanday school superintendents, which is no tiong against church or Sunday school, it is a compliment to Christianity, which we call the homoge paid by vice to virtue. New Jersey sternly punishes this kind of crime. There was at one time in the state prison at Trenton a 'banker a row, 'containing the colis of ton bank officers sent up for theft. Few states have been without conspicuous representatives of the sober scoundrel class whose crimes have sent inno cent people to the almshouse for support. Wait ruined a national bank in Vermont, and the fed eral arm was strong enough to land him in the penitentiary Brainerd ruined a St. Albans trust company and as now a fugitive from pastice. President Mct och, of Princeton, who lived for sixteen years in Ireland and whose sympathies natu ally go out to the Ulster Presbyterram, be I eventhat M. Gladstone's measure, or one like it in all ensential respects will be passed sooner or later. In the course of a very able letter in the New York Matthan 1 press he advises his Presby terian friends in Iroland to accept the sitnation and to fight the lattle on the n w ground they are constrained to occupy He thinks that there are great risks that the rights of Protestants will be tramped upon, the system of edu-cation interfered with and the energies of the most indus rious classes in Ireland crippled.
But he can see no other practical solution of the
complex questions with which Mr Gludstone is
courageously dealing than home rule.

prevening the whole mass of patronage from passing through the corrupt or selfish hands of congressmen, who have been accustomed to disrichite it where it would do them the most good, who have jaid off their private political deb s by filling the public service with their political pimps and panders For this reason, and infertains the broken winded school maters and degrepit loctringires, who added the larber shop and bath house of competitive examina-tions to the law, to propound inconsequential connections in geography and nestory, to the can digates. The argument for it is about as convincing as that urged by the old woman, who unissed on greasing her husband s toes for the quinsy on the ground that if it did not do any good it terts ally could not so any harm. He is mally to eat anything or to skeep, and is very weak. This, however, is the usual after effect of an overdose of a noxious drug. Geismandos ciothes were examined Tuesday night, chority after the physicians arrived, when it was found that he had inpped open a place in one of the armholds of his vest between the cloth and the lining, and stowed therein an envelope containing anserte. The package was removed and placed out of Geismandos reach, for feat he might take another dose of the poison. Yesterday opening an attorney visited Geismando and obtained from him an order on Marame Foste for \$104, which the medame infinediately honored. She expressed a desire to see the doctor, but was declied admission, much to her displeasure, the shithorthies having concluded that for the prevent time Geismando shall receive no visitors other than his lawyers and attending physicians. Yesterday afternoon two sistore or charity paid hum a call and were closeded with him for some time. Like all others, Geismando is now regenting and does not want to die as bad as he thought be died. ATILIETIC EMBRITION.—The athletic classes of the Young Men's Christian association gave an exhibition performance last evening in the gynnasium recome. The classes have been during the past six months under instruction of Frof. H. C. Schacht, who hast evening proved himself a most able instructor. The class, numbering twenty-eight, first gave a splendil exhibition of calesthelic exercises, which was followed by work on the parallel bars, closing with a pyramid group. Then followed Indian club exercises, accompanied with unsic, horizontal har exercises, grand pyramid groups anding of war. Too much cannot be said of the ability displayed by the members, who all acquilled themselves well. An interesting mastical programme was interspersed throughout the exercises. A plano solo by Prof. Hellmund was well given, the Æbilm and quarter rendered two celections excellently and received learty energy. Mr. Pred Coffyn sang two songs which were well received. The entertainment throughout was a complete success, and a crofilt to the association.

Miss Jermic Corson, who is known through out the country as the "Shepherdess of the West," came to Montana some years ago and took up a sheep ranch in Meagher country ble did it alone and unaided After a while she sent for her lary brother from Chicago, and made him overseer of her flocks. Matters went well with her, and soon she had a fine band of sheep, and as valuable ranch property as there is in Montana. She took up some land under one or another of the government acts, proved up on time, and became a landed proprietor Now, it happened that the next claim to her own was taken up by an enterprising young mannaned Severance, who, like his fair neighbor, first started a sheep/ranch, and then got hold of some of the soil. They tended flocks in campung for some time, and then severance proposed marriage. He was accepted, and the two united their fortunes, and have been doing botter and better ever since.

There are other girls in Montana just exactly like Mits. Severance, nec (arson, but more are wanted. There are some real old ladges out.

There are other girls in Montana just exactly like Mrs Severance, met corson, but more are wanted. There are some real old ladies out here who have taken up claims, who time adonty, or run a store, but who are a leastly conged to think of matrinion; One dame of this description has a ranch store out on the prarie tear Livingston, rides a horse and shoots like a nan, keen a postoffice, and is the owner of top acres, lately the property of Vincle Sam Another lady living on Boulder creek, named Sarah Davidson, shot a bear in J unarry lad, art with the bounty received for it, as well as the rile of the meat and hite, sho paid for a sewing achine.

COW HERDING. For some time past complaints have been coming to the ears of the city authorities concerning the herding of cattle within the city limits by deirymen who reside on the outskirts of town. Permission was given certain parties some time and to permit their cows to feed upon wacant property in the city providing they were in the city providing they were vacant property in the city providing they were in the care of a herder. The practice, however, has grown to such an extent that it has become an intolerable unisance. Cow owners have even gone so far as to enter private anclosures and permit their animals to trespass. The city authorities have determined that the evil complained of shall cease, and to that end (ity Marshall McMillen last evening informed The Observational McMillen last evening informed The Observational McMillen and their custodians artisted and impounded and their custodians artisted. An attempt to rob the county treasurer's safe was made on Treesday night, but the night-watchman dropped on the game and exchanged some shots with the burglars, but did not succeed in making any captures. The safe door was squiled but no noney obtained, as the funds were in hank. It is supposed that one of the notbens was badly wounded, as he was easily tacked by the blood for some distance.

The republican county convention met in this city last Tuesday and placed in nomination an excellent tacket, and if thorough organization and entriest work will accomplish it. Lane county will take mank among the leading republicin counties next June. The following genterment were chosen to attend the state convention. A Grovey, S. M. Joran, G. S. EVILS OF PARTYISM

McMinnyii Le, April 30 To THE FORTOR OF THE ORE ANALY.

In your issue of the # h inst you publish the resolutions of a political nature passed by M: Minnville grange, and make some comments on

Minn-tile grange, and make some comments on the same A of r comments are fair and, it must be conferred, are too true, so far as they regard matter of a like nature in the past. But why should it be to? The principles laid down in those resolutions are the principles upon which every teroth who feels an interest in the weitare of his country should act. The freedom and perpetuity of our institutions depend upon the poil iteal independence of individuals. When the masses of the people are swayed and controlled by pertison, encroachments will be made on the rights of the people in open defiance of good principles publicly advocated. But to will be made in the form of resolutions, and then easing them to take care of themselves it can't be done by teaching them in a hajfazard way, through the pression it by piblic starts way, through the pression it by piblic spatiers, for this is being dimensionally a unit can be done by a systematic unit wall or gamized course of teaching than in a long anity of course of teaching that it was in the form of the kind these toom ions were adopted in a step in that direction. If they fall short of them inton it will be for want of energetic action on the part of those who approve of the principles laid down in them. The newspapers etand first and foreins of a star end endealors of the misses in this country, and by and through them more can be cone, enter for good or evil, than by any other means. While we cannot expect party organs and paper is that are serving personal interests to the total which is the form of the serving personal interests to the cone, enter for good or evil, than by any other means.

means while we cannot expect party organisand papers that are serving personal interests to give a their make we do have reasons to hipse had independent journals will cheerfully give of the measurance in teaching those principles which we know to be just. Should the time even once when the masses or egit the dup to that standard of political in repeate ento to make the electron of can influe for its blue positions depend upon their personal mainty and remained of bill of the refer to party interest, we can then have justed done to all classes. None will be but to party and their we can then have justed done to all classes. None will be but it up at the expression of others. All will occupy to culturally personal of others. All will occupy to culturally personal or manufactured shown to me and oppression to mother. l art ism has become so rived and agressive in loth parties that it is able to frown down politic

loth parties that it is able to frown down p that of interpretably a few, and the only means left for independent principles to cope with partyiem is by edocuting it in reases of the people to a standard if individual political in tependenta. There is already a unity of feeding on this subject unity the people in the farming districts, and if the grojer course be taken a unity of action can be ensuly obtained. When this uncalled for puty fieling is once allayed, a party no minition in one will cease to be a measure the office of the course.

pury I cling is once allayed, a party no mixton alone will cease to be a passport to office. Can address will be required to show something more substantial.

It is a well known fact that at the last session of the egislature the extremes of the two parties united flut formed a majority which the warted the will of the people in the election of a testina or a donor make this assertion for the purpose of making war upon Mr Mitchell or his friends, but to show to what extremes parties will go to crush out independent thought and action. When the majority party falled to agree, Tue Independence would have dictated the selection of an upruph and capable man and elected him on an independent basis, freed from the sharkles of party, and sent him on his mission to act as he saw best for the welfare of the nation, independent of either party.
